SUMMARY

I am a Full Stack Web Developer with a background in Sociology, Education, Business, Social Behavior, and Customer Service. I recently earned a certificate in Full Stack Development from the University of California, Berkeley Extension with newly developed skills: HTML, CSS, JavaScript, jQuery, Node.js, MySQL, MongoDB, React.js, and responsive web design. After backpacking around 30 countries, I realized that technology and computer science are taking over the world. I want to be a part of the technology evolution to help shape the world into a more modern and productive environment and I am eager to begin my career as a Developer with a fast-paced collaborative team where I can make an impact as well as learn from others.

TECHNICAL SKILLS

PROJECTS

- **Mnemosyne**

Full stack React-app using Sequelize, MongoDB, Express, React, and Node.js. An application that is user friendly to create a yearbook for a school or class.

Main role: Build react components, routes, and controllers. Team organizer, set up initial folders, dividing tasks, and arrange meetings.
